Statistically 1 in 4 women in America have had an abortion. That means all of us are affected by someone who is hurting, grieving and needing healing from the effects of abortion. Serena will give us some practical guidelines on how to be better equipped to minister to those who are hurting. Whether you have had an abortion, been affected by someone who has or just want to be a support to a hurting nation of women - our afternoon with Serena will bring the message of hope, love and forgiveness after abortion.
